The fixed* dimension **Large & Extra-large Highlands** are two of our only three tables to include the impressive 1 1/2" thick, solid plank top. The extension tables have a 1" thick, solid top, and a box-like compartment which hides the geared, equalizer extension mechanism and one leaf. The **Large Highland** extension table includes one leaf to open to 96". It reaches to 114" (seating 12) with an optional non-storing 2nd leaf. The **Extra-large Highland** extension table extends 48" with 3 included 16" leaves to measure 140" long, seating 14 people comfortably. All pedestal-type extension tables are designed with the equalizer mechanism, which moves the top without moving the base. Two chairs will fit, for storage purposes, between the trestle ends in the 78" long table, 3 will fit in that space in the 92" long table and one will fit there in the 60" table, regardless of how large the table top extends to.

The extension table
includes 1 self-storing leaf.

For the space-saving

other dining tables, this one is
