1,690

**Laptop Desk with  
docking station**

\$ 2,470  
2,600  
2,860

Two large lateral files (letter size) sit between two nice-sized cupboards. The *Glasgow* has a Waterfall edge on the top unless requested otherwise. Handles are the Mackintosh handles.

The *Craftsman* includes wood pegs. All file drawers are on heavy-duty metal glides and are file-ready. Add \$140 for an arched profile between the legs on the front and sides, which increases the height by 2".

With today's compact computers, sometimes all you need is a small work surface. The adjustable keyboard tray allows for a full-size keyboard. The laptop desk with its docking station adds organizational help along with the hidden power supply and charging station. The heavy cords of the laptop desk are routed out-of-sight in channels down the legs. Speak with your sales person about your electronic needs for this piece.
